Samuel He

Business Analyst | Data Analytics & Customer Insights

Redmond, WA | 425-588-8563 | he.samuel900@gmail.com | linkedin.com/in/he-samuel/

PROFESSIONAL SUMMARY

Results-driven Business Analyst with 3 years of experience leveraging LLMs, NLP and advanced analytics to drive revenue growth and operational efficiency. Proven expertise in predictive modeling, customer segmentation, and data visualization using SQL, Python, Tableau, and cloud platforms. Track record of delivering actionable insights that influence executive strategy and improve marketing ROI across retail and SaaS environments. Strong technical foundation with B.S. in Mathematics and Finance. Currently expanding capabilities in applied AI, machine learning, and deep learning frameworks such as Natural Language Processing

TECHNICAL & ANALYTICAL SKILLS

- **Data Analysis & Visualization:** SQL, Excel, Tableau, PowerBI, Python (Pandas, NumPy), Google Analytics, PyTorch Google Sheets, R, Jupyter Notebook, DBT, Domo
- **Big Data & Cloud Tools**: AWS (Cloud Practitioner, Solutions Architect – Associate), Snowflake, BigQuery, Netezza
- **Technical Skills & Extra**: ETL processes, Web Scraping, JavaScript, Salesforce CRM, Confluence
- **AI & ML**: LLM workflows (OpenAI), prompt engineering, NLP fundamentals, scikit-learn models, evaluation techniques (train/test split, accuracy, ROC).

EXPERIENCE

Bass Pro Shops **Sept 2023 – May 2025**

Marketing Analyst

Springfield, MO

- Built and maintained 15+ dashboards in Tableau, Domo, and Google Sheets, delivering real-time pipeline visibility and campaign performance metrics to sales, marketing, and merchandising teams across 170+ retail locations.
- Conducted monthly churn forecasting models analyzing 500K+ customer records, helping sales and loyalty teams target high-risk cohorts and improve outreach ROI.
- Analyzed store-level sales patterns and customer visit frequency across competing markets, providing strategic insights that informed executive retention initiatives and market defense strategies.
- Leveraged predictive analytics for customer segmentation (churn risk, purchase intent), directly supporting weekly operational decision-making with evidence-based insights.

Bandwidth **May 2022 - Apr 2023**

Business Analyst

Raleigh, NC

- Developed interactive Domo dashboards using internal enterprise datasets, streamlining data reporting processes and providing actionable insights for sales representatives.
- Extracted performance trends and revenue insights from enterprise financial data using SQL and Snowflake, delivering data-driven recommendations to sales leadership in weekly business reviews.
- Owned dashboard quality and data integrity across reporting infrastructure, implementing validation processes that improved accuracy and supported monthly C-suite executive briefings.

Luokung Technology **Apr 2021 - Aug 2021**

Market Research Analyst (Intern) *Beijing, China*

NCFA Canada **Jun 2020 - Nov 2020**

Marketing Research Analyst Co-op *Toronto, ON*

EDUCATION

Northeastern University **Sep 2017 - Dec 2021**

B.S., Combined major in Mathematics and Business Administration (Finance)

PROJECTS & ACHIEVEMENTS

Independent AI & Data Analytics Projects

Jeopardy! NLP Project: Built Python NLP pipeline analyzing 500K+ Jeopardy! clues to uncover semantic trends, difficulty shifts, and language patterns using natural language processing and statistical modeling.

Customer Review Intelligence System: Processed 1M+ Amazon reviews using LLMs (GPT-4o/Claude 3.5) and RAG to classify sentiment and detect emerging issues; implemented a validation framework comparing LLM outputs against scikit-learn baselines.

News Analytics Project: Conducted large-scale news analysis using applied AI, machine learning, and NLP to extract key themes, evaluate topic patterns, and compare semantic groupings with traditional keyword-based clustering methods.

Achievement: National Chess Master at age 16
